

**An emulsifiable spray adjuvant to enhance the spreading, wetting and penetration of pesticides.
Contains 682.5 g/l (75% w/w) fatty acid methyl esters of Rapeseed Oil.
FOR USE ONLY AS AN AGRICULTURAL AND HORTICULTURAL ADJUVANT.**

GENERAL INFORMATION

Diamond is a multi-functional spray adjuvant with superior wetting and penetrating properties. When used as directed, Diamond maximises the activity and effectiveness of herbicides and fungicides in post-emergence applications where enhancement of coverage and penetration are required. Diamond may be used to enhance the activity of herbicides and fungicides in many crops including cereals, maize, sugarbeet, legumes and brassicas. Trials work has shown that Diamond is particularly effective when used with sulfonyl-urea herbicides, cereal graminicides and triazole fungicides.

DIRECTIONS FOR USE

Use Diamond at a concentration of 0.25 - 0.5% of water volume (0.25 - 0.5 litres per 100 litres or pro rata). Use the higher rate in difficult conditions such as high weed populations (herbicides), high disease pressure (fungicides), dense canopies, weather stress, etc. Thoroughly clean out the sprayer after use with a recognised tank cleaner.

MIXING

Fill the sprayer with the recommended amount of pesticide and water according to the manufacturer's instructions. Maintain agitation and add the required amount of Diamond to the tank as the last operation. Continue agitating while travelling and spraying.

STORAGE

Keep cool and dry in a suitable pesticide store. Keep the container tightly closed when not in use and take care not to allow ingress of moisture into concentrated product.

PROTECT FROM FROST. Store above 5°C.

If Diamond is subjected to temperatures below 0°C, it may thicken and become cloudy. It will return to its normal clear fluid state above 0°C.

SAFETY PRECAUTIONS

May cause an allergic skin reaction.

Harmful to aquatic life with long lasting effects.

Warning

Avoid release to the environment.

Wear protective gloves/protective clothing/eye protection/face protection.

IF ON SKIN: Wash with

plenty of soap and water.

If skin irritation or rash occurs: Get medical advice/attention.

Wash contaminated clothing before reuse.

Dispose of contents/container to a licensed waste disposal contractor or collection site except for triple rinsed empty containers which can be disposed of as non-hazardous waste.

Contains: C12-14 ALCOHOL ETHOXYLATE

To avoid risks to human health and the environment, comply with the instructions for use.

PCS No. 92141

Batch No. see neck of bottle

Net Contents: 5 litres

Packed in boxes of 4 x 5 litres
