

# UpRite 750

Contains 750 g/l (66% w/w) Chlormequat chloride in a soluble concentrate.

**FOR USE AS AN AGRICULTURAL PLANT GROWTH REGULATOR ON CEREALS (GIBBERELLIN INHIBITOR).**

**FOR PROFESSIONAL USE ONLY**

UFI: PXGF-7UPH-UX0Y-T1FV

## SAFETY INFORMATION

### Hazard statements

Harmful if swallowed

Harmful in contact with skin

May be corrosive to metals

Harmful to aquatic life with long lasting effects

To avoid risks to human health and the environment,  
comply with the instructions for use.

### Precautionary Statements

Wear protective gloves/ protective clothing/ eye protection/ face protection

IF SWALLOWED: Call a POISON CENTRE or doctor/ physician if you feel unwell

IF ON SKIN: wash with plenty of soap and water

Dispose of contents/container to a licensed hazardous waste disposal contractor or collection site except for triple rinsed empty containers which can be disposed of as non-hazardous waste.

Safety data sheet available for professional user on request.

In case of emergency contact the Poisons Information Centre Tel: +353 1 8092566 or +353 1 8379964

**WARNING**

PCS No. 07417

## DIRECTIONS FOR USE

Crop	Maximum Single Dose (L/ha)	Maximum Total Dose (L/ha/crop)	Latest time of application
Wheat (winter)	2.0	2.0	Up to and including second node detectable stage (GS 32)
Wheat (spring)	1.25	1.25	Up to and including second node detectable stage (GS 32)
Barley (winter)	2.0	2.0	Up to and including second node detectable stage (GS 32)
Oats			
Rye			
Triticale			
Barley (spring)	1.5	1.5	Up to and including second node detectable stage (GS 32)

READ THE LABEL BEFORE USE, USING THE PRODUCT IN A MANNER WHICH IS INCONSISTENT WITH THE LABEL MAY BE AN OFFENCE,  
FOLLOW THE PRINCIPLES OF GOOD PLANT PROTECTION PRACTICE WHEN USING PLANT PROTECTION PRODUCTS.

Approval Holder: **Taminco bv**, Pantserschipstraat 207, B-9000 Gent, Belgium.

**10 Litres**

Batch n°: see container

Manufacturing date: see container.

## WEATHER & CROP CONDITIONS

Optimum straw shortening effects are obtained in crops adequately fertilised and actively growing under warm moist conditions. Application is not recommended when cold, early spring weather is restricting crop growth. If however, application is made during cool weather (8°C or 46°F), the addition of an authorised wetting agent will usually improve the result. Do not apply UpRite 750 when the crop is wet or rain is likely within 3-4 hours.

## RECOMMENDATIONS

Crop	Recommended Timing	Rate of application
Wheat (winter)	Spray from leaf sheath erect GS 30 up to and including second node detectable stage GS32	2.0 L/ha in 225 – 340 L/ha water
Wheat (spring)	Spray from leaf sheath erect GS 30 up to and including second second detectable stage GS32	1.25 L/ha in 225 – 340 L/ha water
Barley (winter)	Spray from mid-tillering GS24 up to and including second node detectable stage GS32. Lodging control in barley is less consistent than in wheat and oats.	2.0 L/ha in 225 – 340 L/ha water
Barley (spring)	Spray from mid-tillering GS24 up to and including second node detectable stage GS32. Lodging control in barley is less consistent than in wheat and oats.	1.5 L/ha in 225 – 340 L/ha water
Rye Triticale	Spray from leaf sheath erect GS30 up to and including second node detectable stage GS32.	2.0 L/ha in 225 – 340 L/ha water
Winter oats Spring oats	<u>Single Spray</u> Spray when the majority of tillers are at 2 <sup>nd</sup> node (GS32). Do not treat late sown crops.	2.0 L/ha in 225 – 340 L/ha water with an authorized wetting agent at the recommended rate.
Whilst standing power of all varieties is improved, best overall results are achieved with the shorter strawed varieties.	<u>Split Spray</u> First spray: at 1 <sup>st</sup> node GS31 Second spray: at 2 <sup>nd</sup> node GS32	1.0 L/ha 1.0 L/ha Apply each dose in 225 – 340 L/ha water with an authorized wetting agent at the recommended rate.
	It is essential to add an authorized wetting agent to the spray.	

## TANK MIXES

Certain herbicides and foliar feeds (see COMPATIBILITY) can be applied in tank-mix with UpRite 750. If application earlier than normally recommended is required, for example, application with hormone herbicides, the mixture may be applied from the 'five leaves unfolded' growth stage, but the straw shortening effect of UpRite 750 may be reduced. Mixtures of UpRite 750 with herbicides are not recommended on oats.

## COMPATIBILITY

UpRite 750 is compatible with many approved herbicides, fungicides and insecticides. Consult the label of the proposed partner product for confirmation of compatibility. When tank-mixing, strict compliance must be kept with the Directions for Use of this label and with those of the partner product. Contact your distributor/manufacturer for up to date information on tank mix compatibility.

UpRite 750 can be applied with a wide range of foliar nutrients and chelated micro-nutrients. Mix UpRite 750 in the spray tank first. Crop scorch can sometimes occur in mixtures with foliar nitrogen.

## MIXING & APPLICATION

Shake thoroughly before use. Half-fill the spray tank with water. Add the required amount of UpRite 750. Top up the tank with water to the required volume and ensure thorough mixing. Continue agitation until the spraying is completed. Apply the prepared spray as a MEDIUM spray (BCPC definition) by tractor mounted or drawn sprayer. Wash equipment thoroughly after use. RINSE CONTAINER

THOROUGHLY by using an integrated pressure rinsing device or manually rinsing three times. Add washings to sprayer at time of filling and dispose of safely.

SP1: Do not contaminate water with the product or its container (Do not clean application equipment near surface water/Avoid contamination via drains from farmyards and roads).

## UNDERSOWN CROPS

Crops undersown with grasses and clovers may be treated. Check also the suitability of any products applied in tank mixes.

## FIRST AID MEASURES

**If inhaled:** Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention if symptoms occur.

**In case of skin contact:** Wash off immediately with plenty of water for at least 15 minutes. Take off all contaminated clothing immediately. Get medical attention immediately if irritation persists.

**In case of eye contact:** Rinse immediately with plenty of water for at least 15 minutes. Get medical attention if symptoms occur.

**If swallowed:** Rinse mouth. Seek medical advice immediately.

## STORAGE

Keep container tightly closed in a dry, cool and well-ventilated place. Protect from frost.

## DISPOSAL CONSIDERATIONS

**Product & Waste:** Dispose of in accordance with local regulations. Dispose of contents or waste to a licensed hazardous waste disposal contractor or collection site except for triple rinsed empty containers which can be disposed of as non-hazardous waste. Do not re-use the packaging.
